JUPITER: THE GIANT PLANET

A GIANT BALL OF GAS

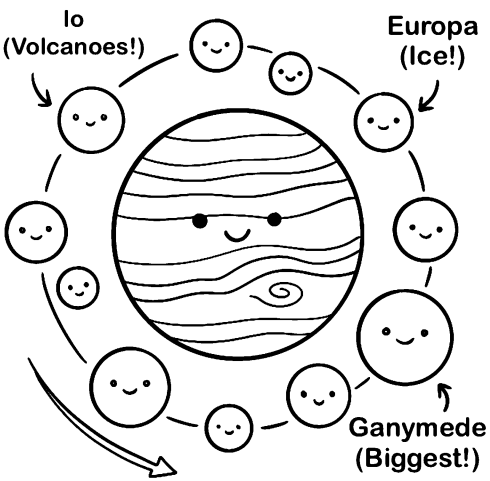

It's made mostly of swirling gas, with no solid surface to stand on!

THE GREAT RED SPOT

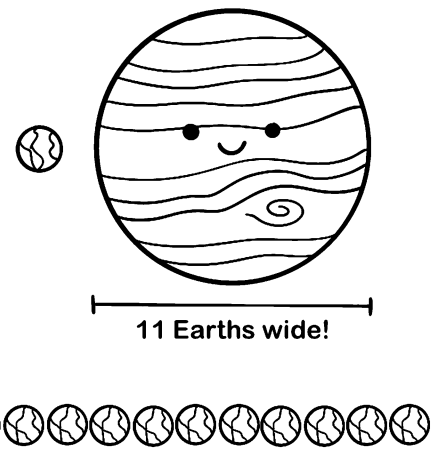

A massive, spinning storm that has been raging for hundreds of years!

SO MANY MOONS!

Jupiter has over 90 moons orbiting around it, like a mini solar system!

SUPER-SIZED PLANET

It's the biggest planet! You could fit 1,300 Earths inside!
